Jewellery Size Chart

Here is a size chart you can print out to give you a better idea of the actual size of our jewellery.

CHAINS & BRACELETS: All our chain codes are measured in centimetres (cm). For Example, the item 40KD-45 is a 45cm curb chain. Here is an **approximate** length conversion into inches:

BRACELETS & ANKLETS:

18cm = 7"	23cm = 9"
19cm = 7 ^{1/2} "	25cm = 9 ^{3/4} "
20cm = 7 ^{3/4} "	
21cm = 8 ^{1/4} "	

CHAINS & NECKLACES

36cm = 14"	55cm = 22"	75cm = 30"
40cm = 16"	60cm = 24"	80cm = 32"
45cm = 18"	65cm = 26"	
50cm = 20"	70cm = 28"	

MEDALS: For most of our medals, the first two digits of the item number refers to its size in millimeters. The last digit or letter(s) of an item number refers to the occasion or saint image. For example, the item 12MMB4-9 is a 12 millimeter (12MM) oval with english writing around the border (B4) Saint Christopher (-9) medal. The 12MMB4-0 is the same shape and style medal but with the Miraculous Medal image.
